

Divine Efosa Idehen

Laravel Developer

Address: Rantya Rd, Jos

Software Engineer specializing in scalable backend solutions and DevOps practices. Experienced in building robust systems using Laravel, AdonisJs, NestJs, and modern frontend frameworks, optimizing performance and enhancing user engagement. Skilled in integrating real-time updates and APIs, significantly improving system reliability.

Passionate about clean architecture and delivering maintainable, high-quality applications that effectively meet user needs.

SKILLS

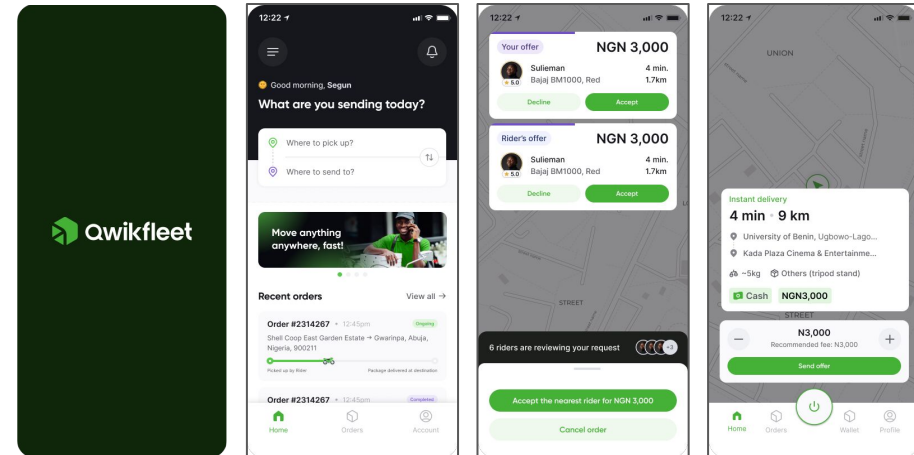

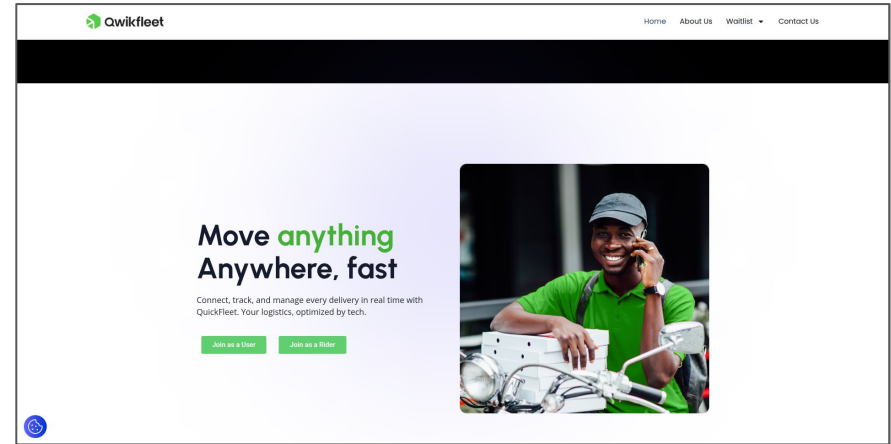

- PHP (5 YEARS)
- Laravel (5 YEARS)
- MySQL (5 YEARS)
- Node.js.(5 YEARS)
- TypeScript (5 YEARS)
- React (3 YEARS)
- Angular (2 YEARS)
- Adonis JS (2 YEARS)
- Nest JS (2 YEARS)
- Next JS (2 YEARS)
- API Integration (5 YEARS)
- HTML/CSS (7YEARS)
- JavaScript (7YEARS)
- Tailwind/Bootstrap (7 YEARS)
- Git (7 YEARS)
- Performance Optimization
- Role-Based Access Control
- Docker
- Nginx
- CI/CD
- Linux Server Administration

QwikFleet

Description: QwikFleet is a goods-hauling and on-demand delivery platform similar to Bolt, but designed specifically for transporting items of any size, from parcels moved by bicycle couriers to large goods transported via trucks. The platform supports multiple vehicle modes, real-time delivery tracking, and seamless payment processing, enabling users to request deliveries instantly while drivers manage haulage efficiently.

Tech Stack: Laravel, Reverb, MySQL, Redis, RESTful APIs, Repository Pattern, Queue Workers, WebSockets, Pusher, Paystack, Docker.

Link: <https://qwikfleet.africa>

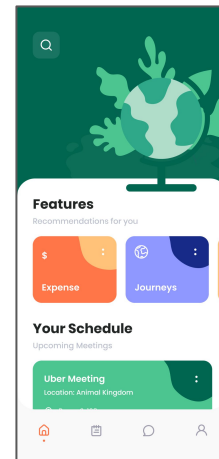

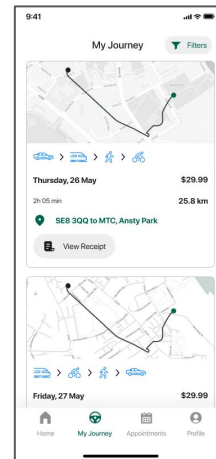

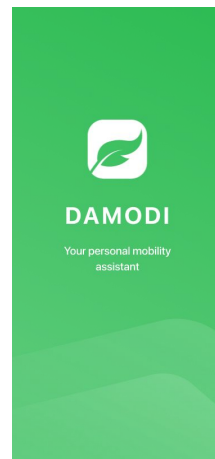

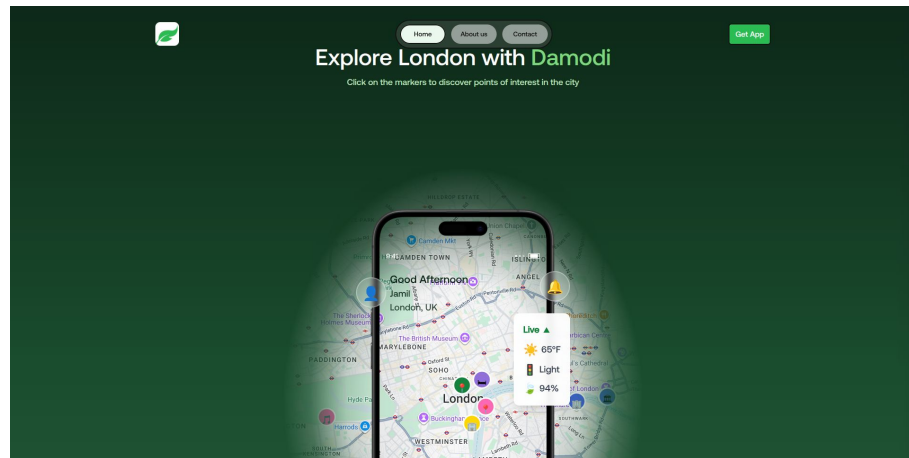

Damodi

Description: Damodi is a UK-based AI-powered platform that optimizes event planning and external mobility providers to automate bookings, routing, and logistics. It serves both individual users and organizational clients, allowing organizations to manage and book rides for their users. This dual approach ensures a seamless experience for both end-users and organizations.

Tech Stack: AdonisJS, TypeScript, Damodi-ML, Redis, Queue Workers, Stripe, PostgreSQL, Docker, CI/CD, Linux, Transport APIs (Duffel, TFL, Distribution, Uber, Lyft, Bolt).

Link: <https://damodi.io>

ReconXi

Description: ReconXi is an AI-powered financial reconciliation platform that automates transaction matching and record verification for accountants, auditors, and corporate finance departments. It enables organizations ranging from small businesses and schools to banks to reconcile bank statements against internal ledgers with high speed and precision.

Tech Stack: Laravel, OpenAi Api, PostgreSQL, Redis, Laravel Queues, Docker, CI/CD, Linux, and Stripe.

Reconcile Your Finances with Ease

ReconXi simplifies financial reconciliation for accountants, auditors, financial analysts, small businesses, and schools. Whether you're managing transactions, handling business accounts, or reconciling school fees and payroll, experience a faster, more accurate way to reconcile your finances.

[Get Started For Free](#)

The image shows the ReconXi app interface on a smartphone and a desktop screen. The smartphone screen displays a 'Matched Results' section with a search bar and a list of transactions. The desktop screen shows a table with columns for 'Amount', 'Status', and 'Date'.

Amount	Status	Date
\$ 645,191	Matched	2/19/2024
\$ 665,159	Matched	2/19/2024
\$ 675,129	Unmatched	2/19/2024
\$ 685,159	Matched	2/19/2024
\$ 695,129	Unmatched	2/19/2024
\$ 705,129	Matched	2/19/2024
\$ 715,129	Unmatched	2/19/2024
\$ 725,129	Matched	2/19/2024
\$ 735,129	Unmatched	2/19/2024
\$ 745,129	Matched	2/19/2024
\$ 755,129	Unmatched	2/19/2024

Problem Statement

Financial Reconciliation Doesn't Have to Be Hard
